

Measurement Paper X

Anonymous Author(s)

Abstract—Quickly summarize the following questions: What did you build? What is being measured? What did you find? What is the broader insight? Why does it matter?

Index Terms—Fault Injection

1. Introduction

Not from the beginning of time! Fault Injection exists. Existing defenses are expensive to deploy universally; therefore developers need methods to identify which code regions are actually vulnerable before applying countermeasures or something.

In summary, we make the following contributions:

- We gaslight
- We gatekeep
- We girlboss

To promote future work, we make the source code of X and our evaluation dataset open and publicly available.¹

2. Overview

Before explaining the technical details of X, we first discuss different aspects and Y that make them interesting and challenging.

3. Design

In the following, we introduce the design and structure of X. We provide an overview of X in Figure 1.

4. Evaluation

We aim to answer the following research questions:

- RQ1: What is research?
- RQ2: How is research?
- RQ3: Why is research?
- RQ4: Can a research borrow a fry?

4.1. Experimental Setup

We evaluate using this and that. Baselines?

4.2. Environment

Blah blah blah Linux go brrr

4.3. Metrics

Define equations if needed

4.4. Results

Read off and highlight the takeaways from each figure and table. Paragraphs with numbers! As shown in Figure 2...

5. Discussion

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum. This suggests A. This appears to show B.

5.1. Limitations & Future Work

This is out of scope and does not invalidate results. This is hard but an important direction for future work.

This assumption leaves E unmeasured. Our work measures E.

7. Conclusion

In this work, we presented X. Our results show Y, providing Z
